THE BEAUTY OF COMPREHENSIVE CARE

Motivated by a desire to remain on the leading edge, Dr. Pozner partners with a talented team **DEDICATED TO WELL-BEING, BEAUTY AND ANTI-AGING**, enabling patients to comprehensively address their aesthetic concerns—whether they relate to weight-loss, preventive medicine, nutrition, dermatology, cosmetic enhancement, age management or all of the above. More specifically, he routinely refers patients to colleagues within his practice for adjunct treatments and complementary care to maximize results. He feels this helps to **OPTIMIZE THE LEVEL OF SERVICES OFFERED**. “Our skilled professionals personalize care and work together to comprehensively attend to patients’ individual needs,” says Dr. Pozner. “Our office participates in many FDA studies and offers innovations rapidly, so a separate center just made sense.” Always on the forefront of innovation, Dr. Pozner is excited about the new technology he promises to have in the years to come. Furthermore, while Dr. Pozner’s practice maintains a **HIGH-TECH PROFILE**, it doesn’t come at the expense of customized, patient-centered care. “We pride ourselves on the personalized level of care we offer patients, as well as the unyielding compassion and respect we have for them.”

INSIDE INFORMATION

synergistic beauty

Dr. Jason N. Pozner’s multidisciplinary practice, Sanctuary Plastic Surgery, encompasses multiple aspects of care to help patients look and feel their best. It has generated a loyal patient following via a holistic synergy of innovative procedures and medical professionals.

While nearly 80 percent of Dr. Pozner’s practice is dedicated to corrective cosmetic procedures, the board-certified plastic surgeon, lecturer and author, recently partnered with internationally recognized dermatologist Dr. David Goldberg, at right, to create the Sanctuary Medical Aesthetic Center, a 6,000-square-foot facility adjacent to his surgery practice. “Our practice serves as an all-inclusive rejuvenation headquarters, where patients can realize their goals in an encouraging atmosphere,” says Dr. Pozner, who notes that his “sanctuary” features a world-class laser facility, fully equipped with cutting-edge technology.

SMAC also counts Dr. Kurt Wagner and Dr. Christine Haugen among its plastic surgeons. They are complemented by weight reduction internist, Dr. Murray J. Pozner, and resident nutritionist Pascal Durand, a former competitive bodybuilder. Also offered are anti-aging regimens with esteemed specialists Drs. Leonard Haimes and Mitchell Matez, as well as massage therapy, and acne treatments. “A woman might have liposuction or a breast augmentation and also desire to lose weight. In this case, in addition to plastic surgery, I would refer the patient for weight-loss and nutritional counseling here within the practice,” says Dr. Pozner.
